```java
package classes;

public class SavingsAccount extends Account {

    public SavingsAccount() {

        super();
    }

    public SavingsAccount(int id, double balance) {

        super(id, balance);
    }

    public void withdraw(double amount) {

        this.setBalance(this.getBalance() - amount);
        if (this.getBalance() < 0) {
            System.out.println("ERROR: Savings account cannot be overdrawn");
            this.setBalance(0);
        }
    }
}
```
